

# DENT LINER+

COMPLETE SOLUTION

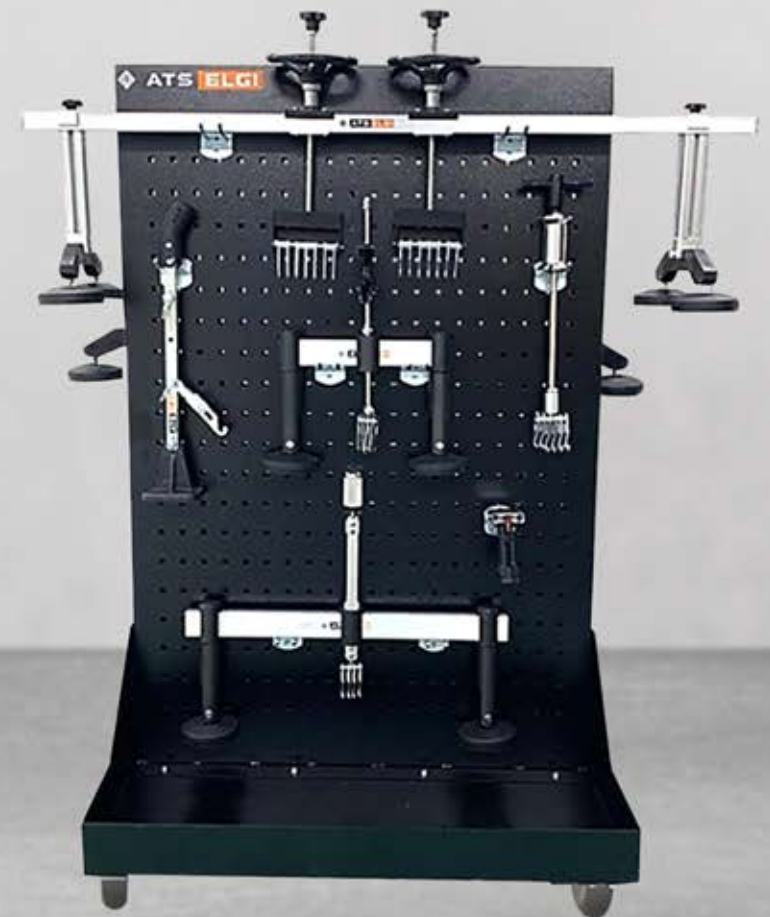

**FASTER**

**PRECISE**

**EFFICIENT**

**FASTER****PRECISE****EFFICIENT****TRADITIONAL PROCESS**

Time-consuming as one needs to remove & reinstall electronics/ wiring like Power windows, Central locking, etc. to repair the panel dents on doors & other car body parts which will result in lower productivity & Operator fatigue.

Requires Highly skilled manpower and often ends up with uneven finish in panel repair. Hence uses more Putty for covering up the uneven gaps which will result in Increased putty usage, low quality of repair, higher painting cost & low-profit margins.

Often ends up replacing the panels thus low profit to a body shop and also dissatisfied customers due to higher repair cost & longer delivery time since of parts availability.

**USING DENT LINER+**

Repair dents from the outer surface.No need to touch car electronics or power windows. Chip out the paint, weld washers, and start pulling. The system helps body shop mechanic to repair the dents 10 times faster.

The system helps the operator to repair all kinds of dents with special tools more precisely even with low operator skills. High precision ensures maximum surface finish hence minimum usage of Putty thus lower painting cost with higher profit margins.

No Matter what kind of dent, let it be minor/ medium/ major, you are always ready with the right tools to repair the dents more efficiently also with precision. Ensures higher profit, higher productivity, happy customers, and even happy insurance companies, since of reduced claim amounts.

**Faster, Precise & Efficient always results in higher productivity and profitability.**

# FEATURES

- Heavy duty spot welder with hammer
- Automatic TAB shooter
- Wavy wire welding
- Triangle / TAB / star washer welding
- Carbon shrinking
- Contact shrinking
- Flexible pulling bars
- Aluminum hammers set
- Hammer and dolly sets

# ADVANTAGES

- Heavy duty cycle for continuous use
- Saves man hours drastically
- Different lever bars for special application
- Separate trolley spotter for mobility
- Increases body shop productivity & profitability

# SPECIAL FEATURES

## TAB SHOOTER: AUTOMATIC RELOAD

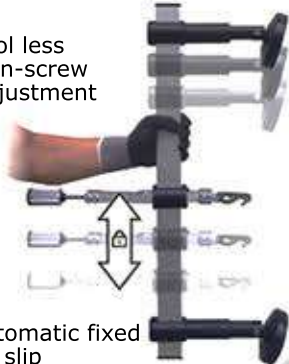

## PANEL BEATING SPECIAL TOOLS

## FLEXIBLE PULLING BARS – EASE OF USE

### Hook & support leg movable

Tool less  
Non-screw  
adjustment

Automatic fixed  
No slip

### Multi-angle adjustment

Ball stud designed. Strong adaptability

Multi-length middle bar changeable

300-1500mm Customizable

### Tool less, Screw free assembly & disassembly
