

ATS ELGI
THINK LONG RUN

Mobile Service Units

Construction ■ Mining ■ Cements ■ Iron & Steel

Complete Support - Anywhere, Anytime

Legacy of complete support

ELGI pioneered the Mobile Service Technology in 1976 with building its first MSU (Mobile Service Unit) for Bhilai Steel plant. ELGI, now with the expertise of building over 800 MSUs and with its dedicated R&D team for continuous product improvement delivers MSUs with best ergonomic design, ruggedness, aesthetics and safety. A good number of MSUs over 35 years are still running at their best, worldwide.

ATS ELGI Mobile service units comprise of servicing equipments like grease pumps, oil pumps, air compressors, hose reels, diesel generating sets, welding equipments, work space, pneumatic tools, control panels, car washers, storage tanks, tool trays, fire extinguishers, tyre inflators, etc.

The Mobile Service Unit is principally a "Workshop on Wheels" with a variety of workshop equipments installed on a truck / van chassis. The Mobile Service Units are extensively used in construction industry, cement industry, iron & steel plants, mining industry and defense, where there is a requirement to service equipment or machinery in remote areas. Mobile Service Units reduce machine breakdown time and helps in total preventive maintenance of machines.

Complete Support - Anywhere, Anytime

Water Sprinklers

Our expertise also extends to fabrication of Water Sprinklers ranging from 3000 - 16000 Litres.

In House Equipments

The equipments mounted inside the Mobile Service Unit are manufactured in house.

As a Package

- A unique package of technology to repair, service and lubricate the immovable machines at far flung places
- Vital ancillary at highway breakdowns and construction sites
